

Program Manager, Technical Services - UK

Typically a graduate with a Mechanical / Aeronautical Engineering related degree having a minimum of four years previous relevant industry experience.

The post holder will have numerous responsibilities including:

- Supporting major asset acquisition deals and an extensive consultancy client base
- Developing and expanding commercial, regulatory, contractual and financial knowledge
- Delivering projects to all commercial aviation sectors (airline, financier and leasing)

All projects will be expected to be managed with an acceptable level of technical and commercial proficiency and understanding in compliance with the company's Procedures Manual and industry regulations.

TES is looking for candidates who can demonstrate knowledge, experience and ability to deliver across a portfolio of Asset Management services.
